Status	Finished
Started	Wednesday, 21 October 2026, 10:22 PM
Completed	Wednesday, 21 October 2026, 10:24 PM
Duration	2 mins 15 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 1.00 out of 1.00

What is a key disadvantage of Bubble Sort compared to more advanced algorithms like Merge Sort?

a. Bubble Sort does not guarantee sorted order
b. Bubble Sort is difficult to implement
c. Bubble Sort is less efficient for large lists
d. Bubble Sort cannot handle duplicate elements

The correct answer is: Bubble Sort is less efficient for large lists

Question **2**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

a. Quick Sort
b. Merge Sort
c. Heap Sort
d. Bubble Sort

The correct answer is: Bubble Sort

Question **3**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

a. Heap sort

b. Insertion sort

c. Bubble sort

d. Quick sort

The correct answer is:
Insertion sort

Question **4**

Complete

Mark 1.00 out of 1.00

In Merge Sort, what happens after dividing the input into smaller parts?

a. Each part is searched for a specific element

b. The parts are ignored

c. Each part is sorted independently

d. The parts are merged without sorting

The correct answer is: Each part is sorted independently

Question **5**

Complete

Mark 1.00 out of 1.00

What does the Bubble Sort algorithm primarily focus on during each pass?

a. Bubbling up the smallest element

b. Bubbling up the largest element to its correct position

c. Dividing the list into halves

d. Sorting the entire list in one pass

The correct answer is: Bubbling up the largest element to its correct position

Question **6**

Complete

Mark 1.00 out of 1.00

What is a characteristic of the merge sort algorithm?

- a. It is based on the divide-and-conquer approach
- b. It does not require recursion
- c. It sorts data using a single pass
- d. It is less efficient than bubble sort

The correct answer is: It is based on the divide-and-conquer approach

Question **7**

Complete

Mark 1.00 out of 1.00

In the context of sorting, what does the divide-and-conquer approach involve?

- a. Rearranging data without sorting
- b. Dividing the input into parts, solving each part, and combining the solutions
- c. Sorting data in a single pass
- d. Sorting data sequentially

The correct answer is: Dividing the input into parts, solving each part, and combining the solutions

Question **8**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is described as making multiple passes through a list, comparing elements, and swapping adjacent items that are out of order?

- a. Merge Sort
- b. Quick Sort
- c. Bubble Sort
- d. Insertion Sort

The correct answer is: Bubble Sort

Question **9**

Complete

Mark 1.00 out of 1.00

What is sorting in the context of computer science?

- a. Arranging data in a particular format
- b. Searching for data in a list
- c. Deleting data from a list
- d. Inserting data into a list

The correct answer is: Arranging data in a particular format

Question **10**

Complete

Mark 1.00 out of 1.00

What is the primary advantage of the divide-and-conquer approach in sorting algorithms?

- a. It only works on small datasets
- b. It simplifies the sorting process by using only one pass
- c. It avoids the need for recursion
- d. It allows for efficient parallel processing and sorting of data

The correct answer is: It allows for efficient parallel processing and sorting of data

Question **11**

Complete

Mark 1.00 out of 1.00

Which algorithm is efficient for analyzing the frequency distribution of items in a list?

- a. Linear Search
- b. Merge Sort
- c. Bubble Sort
- d. Quick Sort

The correct answer is: Merge Sort

Question **12**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm would be preferred for its divide-and-conquer approach?

- a. Merge Sort
- b. Linear Search
- c. Bubble Sort
- d. Binary Search

The correct answer is: Merge Sort

Question **13**

Complete

Mark 1.00 out of 1.00

Which of the following best describes the term "sorting" in computer science?

- a. Merging two datasets
- b. Finding a specific element in a list
- c. Arranging data in a specific order
- d. Removing duplicates from a list

The correct answer is: Arranging data in a specific order

Question **14**

Complete

Mark 1.00 out of 1.00

Which Python function would you use to sort a list in-place?

- a. arrange()
- b. sorted()
- c. sort()
- d. order()

The correct answer is: sort()

Question **15**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm involves comparing elements and swapping adjacent items that are out of order?

a. Linear Search
b. Binary Search
c. Merge Sort
d. Bubble Sort

The correct answer is: Bubble Sort
